

Plant Buyers' Accord

I, Carl McGuinness

Confirm that TNC New Zealand Trust

has signed up to the Plant Buyers' Accord.

I understand that the Accord has been established under the Plant Pass brand to support and encourage the uptake of the voluntary Plant Production Biosecurity Scheme (PPBS) by plant producers. Plant Pass is designed to reduce risks associated with the plant production pathway.

As our commitment to the Accord, we undertake to:

- Use our influence to support and incentivise plant producers to improve their biosecurity practices by engaging with Plant Pass.
- Over time, give preferential support to plant producers who are becoming, or are, certified under Plant Pass, or another scheme that is recognised as equivalent.
- Develop an action plan to give effect to our commitment within three months of signing this document. The plan will be tailored to our organisational needs and resources.
- Share our action plan with other signatories and the wider public.
- Hold ourselves accountable to the targets we develop.

I acknowledge that Accord Signatories will meet annually to be briefed on industry participation to PPBS, to review progress, and recommend any changes to the Accord.

Signed

Acting Country Director
